

PROMISE Pegasus J4

Use Cases

Audio/Video Production

Lightning fast performance can handle multiple streams of uncompressed high-res video

Work remotely with a laptop to backup footage & start editing while in the field

Server-Storage Solution

The perfect stackable companion for a Mac mini to create a cost effective server-storage solution

Graphic Artists & Photographers

Pros dealing with raw images & high-res files can customize the solution for an ideal combination of performance & capacity

SMBs

Meets demand of office use for external data storage and super-fast and secure backups

Save Countless Working Hours

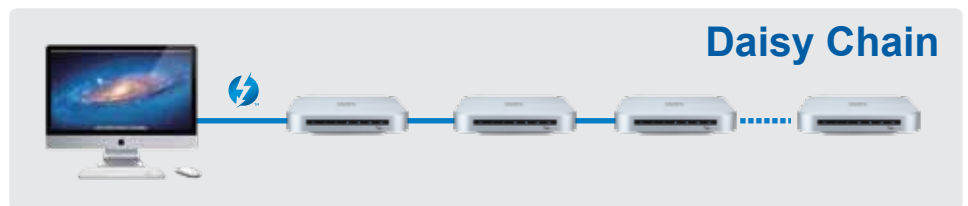

The Pegasus J4 is the fastest 2.5" HDD/SSD Thunderbolt enabled solution available, reaching transfer speeds exceeding 700MB/s with SSDs installed and up to 480MB/s with hard disks (7200 rpm) installed. The Pegasus J4's 4-bay design enables the performance to reach speeds that competing 1 or 2-bay solutions simply can't match.

The Perfect Companion for a Mac mini

The Pegasus J4 is the perfect stackable companion for a Mac mini to create a cost effective server-storage solution. By combining a Mac mini with the J4, you can enjoy the peace of mind provided by a Thunderbolt enabled RAID storage device as well as the freedom to add Pegasus devices when you require more capacity.

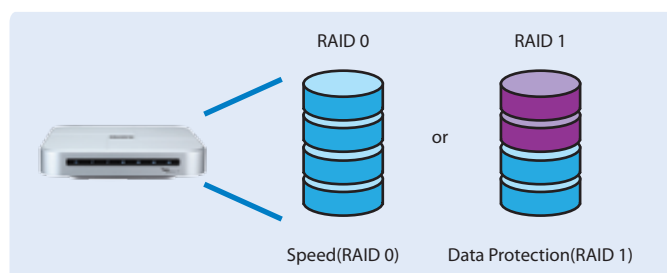

Incredibly Versatile

The compact, efficient design enables you to work remotely with a laptop to backup footage and edit content right on-site. Additionally, since the Pegasus J4's dual Thunderbolt ports support daisy chaining, users can conveniently connect Thunderbolt enabled displays or Pegasus storage devices to boost overall transfer speeds.

Your Work is Too Important to Lose

If you need the data protection of disk mirroring, configure the J4 in RAID 1 so your data will be safe even if an installed disk fails. If you need super-fast speed for video editing, configure the J4 in RAID 0. Even better, combine both needs and configure two daisy chained J4s in a RAID 10 (RAID 1 + RAID 0) for performance and redundancy.

Portable. Powerful. Versatile.

Pegasus J4 Thunderbolt Storage

Just How You Like It

The Pegasus J4 delivers the flexibility to purchase a plug and play model with 4 hard disks pre-installed or to purchase the J4 enclosure and customize the solution. Graphic artists and photographers working with raw images and high-resolution files can deploy a solution with the compatible drives of their choice to meet the requirements of their application.

Pegasus J4	
Picture	
Form Factor	4-bay JBOD enclosure
Hard Drives/SSDs	Supports 2.5" SATA SSDs and HDDs (replaceable disks)
RAID Levels	JBOD or software RAID
OS Support	Mac OS X 10.7 & 10.8
Thunderbolt Technology Ports	2 ports - Supports daisy chaining
Capacity	J4 Enclosure (4 x 500GB HDD (5400 rpm)) – 2TB of raw capacity, & J4 Enclosure Only - 0TB*
Dimensions	4.2 x 20.1 x 20.1 (cm)
Weight	Durable, lightweight aluminum enclosure • J4 Enclosure: 1.6 Kg • J4 Enclosure with HDDs: 2.4 Kg
Warranty	2 year warranty

*Note: Please select the HDD from the J4 HDD compatibility list and make sure the height of the HDD you select is below 9.5mm. Contact our dedicated telephone support team of technical experts five days a week from 9am - 5pm (where available) and they will happily assist you with any issues you may have.

- Supports Time Machine in Mac OS X
- Preconfigured in RAID 0 using MAC OS X Software RAID
- Thunderbolt cable required (sold separately)
